

ALUMINUM AIR DRYER

X1220

Aluminum Air Dryers are perforated aluminum canisters containing indicating silica gel. They are non-corrosive and protect against rust, corrosion, mold, mildew and spoilage due to humidity.

Visual Indicator

The aluminum canister has a monitor window on top for visual indication. The orange indicating silica gel turns to green as it adsorbs moisture and can easily be regenerated in an oven at 250-300 °F until the silica gel turns back to orange color.

Typical Applications

- Laboratory Equipments and Chemicals
- Video Cameras and VCR Equipments
- Safes/Vaults/Safety Deposit Boxes
- Medical & Dental Instruments
- Nautical Equipments
- Camping & Fishing Equipments
- Binoculars & Telescopes
- Firearms & Gun Cabinets
- Silverwares
